Following the successful action initiated in the XXVIII ICPEAC, a set of tutorial lectures will take place on Tuesday 21st July in the Toledo Congress Centre. The lectures will give a pedagogical account of the most recent advances in the field of photonic, electronic and atomic collisions. PhD students and young researchers, registered in ICPEAC, are invited to attend the tutorials without extra fee. The program will include four lectures presented by the distinguished scientists:

- **Reinhard Dörner**, Goethe- Universität, Frankfurt am Main, Germany
- **Joseph H. Macek**, University of Tennessee, USA
- **Tom Gallagher**, University of Virginia, USA
- **Jan M. Rost**, Max Planck Institute, Dresden, Germany

More information will be available at the ICPEAC website shortly.
